SID - School Information Database

The complete solution for all your pupil, curriculum and coursework issues.

At less than ½ the price of many other Schools Information Managements Systems. just buy the modules you need and have them tailored to the precise requirements of your school

Extend the National Curriculum with the Curriculum Modeller

- Define the hierarchical structure for a curriculum and a programme of study for each element.
- Set rules for marking and recording of quantitative and qualitative information, such as teacher assessments, parent and pupil comments.
- Set rules for Progress Reports (e.g. end of key stage) and time scales for Progress Results.
- Administrator functions for updating the database such as user enrolment There are many system support functions to assist in maintenance

Pupil Journals

- Recording academic progress - Input marks and test results and add comments from practitioner, student or parent/guardian. Where *SID* is linked to *LettersHome* comments can he collected from this system and can be updated as frequently as necessary.
- Progress Results, Progress Record and Attendance Record Reports are generated according to the rules specified in the curriculum modeller can be viewed on-line, printed or emailed to designated pupil contacts When *SID* is linked to *LettersHome* secure delivery is guaranteed.
- Personal details, Contacts, Medical Information details can be entered into *SID* or collected automatically from *LettersHome* to reduce administrative overheads

Whole School Reporting

- School results - annual reports are generated from the academic progress database automatically. For internal use these can be broken down into greater detail and viewed at my time.
- Alert monitoring for pupils, for example attendance records or medical conditions.

Open Interfaces

- Interface to *LettersHome* Web Portal to he able to distribute school reports to parents.
- *SID* has interfaces to Virtual Learning Environments (VLE) such as Moodle. This allows course material and resources to be published via the Internet.
- Designated web sites can be accessed directly from *SID* quickly and easily by means of its own secure web browser.

Advanced Features

- Simple flat rate pricing for each module `
- Annual support is ranked for each school user, not parents.
- The main database and processing facilities of *SID* are held on a cencral server which can be hosted by us or installed on your own Intranet.
- Multiple sites are linked via a local network or by the Internet, using the same secure technology used by banks.
- Client software is held on an *AppsDrive* (USB Flash Memory Drive with security software) for a small footprint and trouble free PC installation.
