

AVG Internet Security Business Edition 2016

Powerful new features that protect your business

- ✓ AntiVirus and Malware Protection
- ✓ Business Firewall Security
- ✓ Email Server Protection
- ✓ File Server Protection
- ✓ Remote Management
- ✓ Free Phone Support
- ✓ Always Updated

AVG® Internet Security Business Edition 2016 is more powerful than ever before with new features designed to keep your critical business and customer data safe from the latest threats and viruses, protect your email and file servers, and keep your employees safe online.

AVG Internet Security Business Edition 2016

Stop online threats. Not business

Keep business moving with AVG's award-winning endpoint protection. Protect your business network from the latest viruses and online threats. Block hackers and stop malware from taking over your computers or laptops on wired and wireless networks.

Keep employees safe online with Network AntiVirus

Free your workforce to surf, search and download with confidence. Smart prevention technology checks every web page and alerts you if it detects anything suspicious. WiFi Guard helps you avoid rogue WiFi access points used by hackers.

Keep business communication clean, clear and fast with Email Server Protection

Send messages with confidence and remove clutter from your inbox. Reduce your risk from online spam; scanning detects infected or rogue inbound attachments.

Keep customer information safe from hackers with File Server Security

Maintain your integrity as a reliable business partner by ensuring all your customer data is kept private.

Control your computers and servers with remote management from a single console

Manage your endpoint protection and server antivirus software remotely on your network and stay in control no matter where you are. Easily deploy and manage your network antivirus software on your PCs, laptops and file servers.

Free phone support

Breathe easy knowing that AVG experts are always a phone call away.

Smart, actionable alerts

Detects and alerts you to problems that you can address easily from the simple dashboard.

Powerful new features in AVG Internet Security Business Edition 2016

Scan faster with our new Scanning Engine

The 2016 scanning engine implements our most advanced algorithms that shorten scanning times so customers can work more efficiently and effectively.

Secure deletion with File Shredder

New for 2016, File Shredder securely deletes data to help prevent unintended recovery.

Secure your most valuable files with Data Safe

Create encrypted, password protected virtual disks on your systems and add another layer of protection for your folders and files.

Protect against the newest Malware with Outbreak Detection

New for 2016, we use advanced artificial intelligence to proactively identify malware samples

that haven't yet been catalogued by our AVG VirusLab team.

Protect from the quick click with Online Shield

Online Shield is improved with cloud-based detection to identify dangerous downloads faster than ever. Check files before you download them to help ensure they are safe and stay protected if you are exchanging files using MSN, Yahoo! and ICQ.
